MASTERS STUDENT

Exemplary diligence and strong adaptability. Equipped with solid skills in analysis, algebra, geometry, probability and topology, I am motivated by intellectual challenges and ready to apply my analytical abilities and rigor to innovative projects. A collaborative team member who thrives in group environments and values diverse perspectives.

EXPERIENCE

Masters thesis on basic theory of manifolds

Université de Lorraine (Metz) July 2025

- Individual project, study of the orientability of smooth manifolds, and of De Rham cohomology

Part-time job

Carrefour City (Montigny-les-Metz) 04/22 - 08/24

- Managed product replenishment and inventory stocking
- Digital marketing and content creation for the store
- Operated the point-of-sale (POS) system, processing customer transactions with accuracy and efficiency.

Bachelors thesis on knot theory

Université de Lorraine (Metz) May 2023

- Collaborative project, study of the topological invariants of knots, as well as some applications
